# OPERATIONAL RISK MANAGEMENT SOLUTION

SAFEGUARD THE FUTURE OF YOUR ORGANIZATION

WHAT SHOULD YOU KNOW ON FACILIZATION'S OPS RISK TOOL?

The Operational Risk Tool, built on the **low-code Creatio platform**, streamlines operational risk management with a robust framework to identify, assess, monitor, and mitigate risks. Designed for strict compliance with industry regulations like **Basel Accords**, it seamlessly integrates with workflows, delivering **intuitive dashboards**, **real-time reporting**, and **automated assessments**. By enhancing governance and enabling actionable insights, the tool fosters **proactive risk management and smarter decision-making.**

OPERATIONAL RISK MODULES

1. **Centralized Repository of Operational Losses**
2. **Incident Management**
3. **RCSA (Risk and Control Self-Assessment)**
4. **Extreme Scenarios Library**
5. **Dynamic KRIs Configuration and Monitoring via Graphical Dashboards**

Each module leverages Creatio's powerful low-code capabilities to streamline processes, ensure regulatory compliance, and enhance the collaboration across all business functions—from executives and risk managers to business process owners.

WHY SHOULD YOU PARTNER WITH FACILIZATION?

Facilization's deep knowledge of the risk management domain coupled with our continued focus on delivering excellent pre-integrated solutions provides the best of both worlds.
