

STREAMLINE, MODERNIZE AND FUTURE-PROOF YOUR INTEGRATIONS

Say goodbye to fragile integrations **and hello** to seamless connectivity with **F-Orchestrator**.

Built for banks, digital banks, EMIs, and PSPs, it replaces point-to-point setups with a scalable platform and real-time visibility - making payment troubleshooting easy.

BUILT FOR BANKING COMPLEXITY

- Built to fit your needs today and scale tomorrow, **our flexible flow builder supports both visual development and coded workflows**—so you can build your way.

WHY F-ORCHESTRATOR?

Decoupled Systems: Modernize gradually while scaling with incremental upgrades.

Enhanced Visibility and Control: Real-time monitoring of integration flows and transactions for faster payment troubleshooting.

Cost Efficiency: Replace fragile point-to-point setups with a scalable platform that lowers CapEx and OpEx.

- Version control, simulation, and exception handling ensure precision, while real-time monitoring and smart scheduling keep operations running smoothly. **Robust RBAC protects your systems, and AI-driven data mapping with visual orchestration makes integration seamless**—innovation without unnecessary complexity.

TOOLS

Low Code: KAOTO Apidog spring AI

Runtime: spring boot QUARKUS

DSL Support: YAML XML Java

Core: Camel K Camel

Debugging & Prototyping: QHawtio JBANG

INFRASTRUCTURE

Container Runtime: OPENSHIFT kubernetes docker

Governance: git GitHub

Security Scanning: sonarqube trivy DEPENDENCY-CHECK

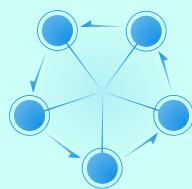

Tracing, Metrics, Logs: Prometheus Grafana elasticsearch

Queueing: ACTIVEMQ kafka

Security: NGINX KEYCLOAK

Let

F-Orchestrator
simplify your integration challenges and elevate your financial operations into the future.
